☐ This opinion has been established on the basis of a translation from the original language into the following language _____, which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).
2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
 - a. type of material
☐ a sequence listing
☐ table(s) related to the sequence listing
 - b. format of material
☐ in written format
☐ in computer readable form
 - c. time of filing/furnishing
☐ contained in the international application as filed.
☐ filed together with the international application in computer readable form.
☐ furnished subsequently to this Authority for the purposes of search.
3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or to be industrially applicable have not been examined in respect of:

☐ the entire international application

☒ claims Nos. 5, 6, 11, 12, 17

because:

☐ the said international application, or the said claims Nos. _____
relate to the following subject matter which does not require an international preliminary examination (*specify*):

☐ the description, claims or drawings (indicate particular elements below) or said claims Nos. _____
are so unclear that no meaningful opinion could be formed (*specify*):

☒ the claims, or said claims Nos. 5, 6, 11, 12, 17 are so inadequately supported
by the description that no meaningful opinion could be formed.

☒ no international search report has been established for said claims Nos. 5, 6, 11, 12, 17

☐ the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the
Administrative Instructions in that:

the written form ☐ has not been furnished
☐ does not comply with the standard

the computer readable form ☐ has not been furnished
☐ does not comply with the standard

☐ the tables related to the nucleotide and/or amino acid sequence listing do not comply with the technical requirements
provided for in Annex C-bis of the Administrative Instructions in that the computer readable form:

☐ has not been furnished
☐ does not comply with the technical requirements

☐ See Supplemental Box for further details.

[0124-129] & US 6587735 B1

The subject matter of claim 1-3, 7-9, 13-15 do not meet the requirement of novelty.

D1 discloses code converting units have one-to-one correspondence to the request-source task units. (fig36, [0002-5])

D1 discloses code converting units, the number of which is smaller than the number of the request-source task units, and assigning unit assigns said code converting units in a prescribed order to the processing requests form the request-source task units. (fig2[0020-30])

The subject matter of claim 4, 10, 16 do not appear to involve an inventive step in view of the D1 and D2 cited in the ISR.

D2 discloses code converting units are constituted by software implemented code converting units for executing code conversion by software and hardware-implemented code converting units for executing code conversion by hardware.

PCT/JP2005/003824

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

In the description page 16 line 6 - page 18 line 23, it is only described that the actual processing is executed solely by the hardware-implemented code processing units or the software-implemented code processing units, and description of the description page 9 line 9 - page 10 line 1 is not clear enough to define technical feature.

Therefore, claim 5, 6, 11, 12 and 17 are not supported by the description as required by Article 6 PCT.
